Valerie and Eric Bressman have been retirement veterans since their 30s. At ages 47 and 51, they've already enjoyed four extended breaks from their jobs in Portland, Ore. Valerie, a manager of human resources communications, and Eric, an architect, saved enough to travel the world for a year in 2005.

Reinventing Retirement - Experience Life

Retirement as a concept began to be widely adopted in the United States after the period of the Industrial Revolution, where numerous aging factory workers began to show signs of aging: slowing down assembly lines, taking excessive sick days and usurping the spots of more youthful, more profitable men with families to bolster. Also, older workers brought about unemployment among the youthful population by declining to resign.

Otis Boykin is best known for inventing an improved electrical resistor used in computers, radios, television sets and a variety of electronic devices. Boykin invented a variable resistor used in guided missile parts and a control unit for heart stimulators; the unit was used in the artificial heart pacemaker, a device created to produce electrical shocks to the heart to maintain a healthy ...

Inventor Otis Boykin Improved the Electrical Resistor

Grace Brewster Murray Hopper (née Murray December 9, 1906 - January 1, 1992) was an American computer scientist and United States Navy rear admiral. One of the first programmers of the Harvard Mark I computer, she was a pioneer of computer programming who invented one of the first linkers. She popularized the idea of machine-independent programming languages, which led to the development of ...

Grace Hopper - Wikipedia

James Watt, Scottish inventor whose steam engine contributed substantially to the Industrial Revolution. He was elected fellow of the Royal Society of London in 1785. Because of his contributions to science and industry, the watt, a unit of power in the International System of Units, was named for him.
